We have successfully added 12 new customers during the quarter taking the total number of active customers to 134.

I will now provide key highlights related to our services business.

We continue to consolidate and build on our reputation as a leader in providing engineering research and development services to a wide spectrum of global corporations. Our deep roots in the semiconductor industry combined with an unparalleled knowledge of 'connectivity', 'multimedia', 'modems' and 'device software' puts us in a unique position to engage with several segments, downstream from the inception of silicon platforms. We have made progress in entrenching our position in the Devices segment, while building a strong customer base in the Auto

and IoT segments. A stellar example of such a project is the auto grade Linux based IVI system we are developing for one of the largest semiconductor vendors. In Auto electronics, we continue to engage with multiple Tier 1 auto OEMs and support the development and enhancement of several auto infotainment and telematics platforms.

On the devices side, our portfolio of offering covers all device categories from smart to rugged devices. We are working with one of the largest rugged device OEMs to build next generation products on new silicon platforms. Additionally, we are enabling upgradation of their existing products to the latest release of the Android Operating System for another OEM. In the wireless network space we continue to develop, enhance and maintain radio networks for railways based on the GSM-R technology. In the satellite segment we continue to be entrusted with turnkey product development of the next generation satellite terminals.

In Fiscal 2017 the rejuvenation of our portfolio of offerings based on the outcome of strategy consulting engagement with a globally leading consultant will gain momentum and open new vistas for growth.

Testing plays a pivotal role in shortening product commercialization timeframes and enhancing reliability both of which are of fundamental importance in the hypercompetitive markets. Our ability to offer a bouquet of Independent Testing Services that are supported by our test automation platform is highly valued by our customers. We are providing testing and product quality assurance services for a leading multilingual messaging services provider across all mobile platforms. OEMs spanning from smart to rugged devices and semiconductor vendors continue to rely on our services for comprehensive product quality, inter-operability and field testing of devices. In the Digital IT arena, we are engaged with a large Greenfield telco to test and ensure the reliability of their application and messaging platforms. We have begun to address the test requirements emerging from next-gen Industrial Automation and IoT platforms and expect customer traction to increase in these areas.

In the Digital IT space, we continue to chip away and make inroads in Application Development and Data Analytics. We have been entrusted with the development of Fleet Management mobile application by a large and diversified conglomerate servicing global auto OEMs. We have made forays in the point of sales market and work with a diversified Japanese corporation to build mobile Point of Sale (mPOS) tablet applications. Our insights platform based offerings continues to help a leading European MVNO achieve a significant reduction in operational cost. We have entered into partnerships with a leader in cross-platform development software and another who is a front-runner in data visualization products. As we continue to widen our ecosystem, we will be better positioned to scale and grow our business especially as bridging the physical and digital world becomes a business imperative in the era of platforms.

We thank you for your interest in Sasken and your continued support. My team and I are committed to always hold all our stakeholders in trust.
